

Student BYOD Wi-Fi connection instructions

Student BYOD

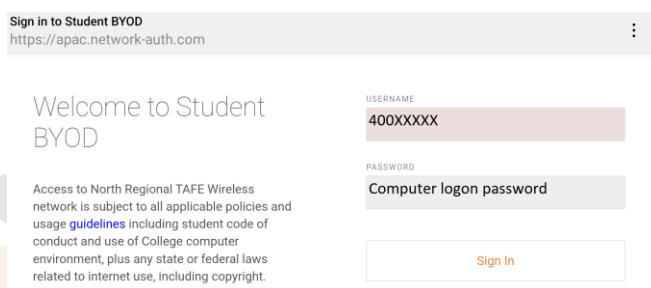

- Students **MUST** have updated their password **before** they can access Wi-Fi. This can be done by logging into a college PC or logging into [Microsoft365.com](https://microsoft365.com)
- This SSID “Student BYOD” is for **Students only** - You must have a valid Student ID/password to achieve access through the Wi-Fi splash-page
- This is **Internet only** – no access to shared drives / internal applications or resources / printing
- Access will **expire daily** and require your students to log in via the splash page everyday – this is to ensure security of the network and responsible use.

Connect using the QR Code

Manual Connection

- Locate the ‘Student BYOD’ Wi-Fi network on the device
- When you see the Student BYOD Wi-Fi network, connect using the password ‘**testmeplease**’
- Your device should direct you to the sign in page – enter your **student ID number and password** in the relevant boxes. **Do not** enter the ‘testmeplease’ password here, it will not work.
